

Backlog Rescue

\$1,500 flat · 5 business days after all required files are received

PROBLEM

Invoices sit ready in principle, but buyer requirements, supporting documents, and purchase-order references never get assembled into one submittable package. Backlogs grow with no register of what is ready, blocked, or missing.

EXACT DELIVERABLE

Organized, review-ready invoice packages; repaired document packages for rejected portal submissions; a prioritized backlog register; and an included billing status report.

INCLUDED WORKLOAD

- Up to 100 invoices
- Up to 8 buyer or customer requirement profiles
- Up to 600 supporting-document pages

TURNAROUND

5 business days after all required files are received.

PRICE

\$1,500 flat

You approve everything. Nothing is signed, submitted, or sent except by you. LogLyn does not log into buyer or customer portals and does not submit for you.

WHAT IS NOT INCLUDED

Portal login and submission; compliance document tracking and package assembly (future service, not currently available); construction progress billing preparation (separate expansion service).
